

SYNTHETIC DEMONSTRATION DATA | REVIEWER-ASSISTED

Document organization sample

Prospect summary - selected review material

I. Record at a glance

What arrived	What is represented	What needs attention
4 delivered PDFs 57 original pages 2 delivery batches	17 account-month periods 19 retained document occurrences Includes 2 duplicate copies	1 outstanding period 1 incomplete statement 1 unresolved page

Represented means a statement period is identified, not that every page is present. Incomplete material and duplicate copies remain visible; neither adds another represented month.

II. Account-by-month coverage

Account / statement period 2025	Jan	Feb	Mar	Apr	May	Jun
Alder Example Bank Household checking / ****1842	Present	Present	Present	Present	Present	Present
Birch Example Bank Reserve savings / ****2953	Present	Present	Present	Present	Page gap	Present
Cedar Example Card Household card / ****3064	Present	Present	Present	Present	Present	Open

Present = period represented. Page gap = represented, but an internal page is missing. Open = expected period not represented. Review = unresolved coverage. These are not findings of discovery sufficiency.

Delivery timing: 7 previously outstanding periods became represented after the supplemental delivery. Timing does not override the current page-gap status.

III. What to request next

Outstanding statement. Cedar Example Card ****3064: request 2025-06-01 to 2025-06-30, under the recorded monthly expectation.

Missing internal page. **D13:** INCOMPLETE: printed pages 1, 3; missing printed page(s) 2. Source: Batch 2 / download_2.pdf / pp. 10-11. This is a recorded review observation, not native automated detection.

Unresolved page. Request the parent document/identity for download_2.pdf, p. 24. It remains in the original delivery, without an approved separated copy.

Fictional data. Native-text proposals were followed by scripted synthetic review actions; no independent practitioner validation or unattended recognition performance is implied.

IV. Selected inventory

Selected 5 of 19 retained occurrences: duplicate pairs and the incomplete statement. The full workpaper and inventory.csv contain every occurrence.

Ref / period	Institution / account	Source pages / review
D01 2025-01-01 to 2025-01-31	Alder Example Bank ****1842 / Bank statement	Batch 1 / doc.pdf / pp. 1-3 Received range / metadata approved
D02 2025-01-01 to 2025-01-31	Alder Example Bank ****1842 / Bank statement	Batch 2 / new_final.pdf / pp. 1-3 Duplicate copy retained
D09 2025-02-01 to 2025-02-28	Birch Example Bank ****2953 / Bank statement	Batch 1 / scan_004.pdf / pp. 22-24 Received range / metadata approved
D10 2025-02-01 to 2025-02-28	Birch Example Bank ****2953 / Bank statement	Batch 2 / download_2.pdf / pp. 21-23 Duplicate copy retained
D13 2025-05-01 to 2025-05-31	Birch Example Bank ****2953 / Bank statement	Batch 2 / download_2.pdf / pp. 10-11 Received range approved; page gap

V. Duplicate findings

D01 / D02 - confirmed synthetic review decision. Retain **D01** for coverage; preserve **D02** as a duplicate occurrence.

Supporting comparisons: Exact source SHA-256 and source page range.

D09 / D10 - confirmed synthetic review decision. Retain **D09** for coverage; preserve **D10** as a duplicate occurrence.

Supporting comparisons: Reviewer-approved statement metadata; Normalized page-text fingerprints.

Each pair appears once above. Multiple supporting comparisons do not add copies or coverage. File hashes establish byte equality against a reference, not authenticity.

VI. Source traceability and review

D01 - Batch 1 / doc.pdf / pp. 1-3.

D02 - Batch 2 / new_final.pdf / pp. 1-3.

D09 - Batch 1 / scan_004.pdf / pp. 22-24.

D10 - Batch 2 / download_2.pdf / pp. 21-23.

D13 - Batch 2 / download_2.pdf / pp. 10-11.

Internal links stay within this PDF. Extract the ZIP to inspect original files and separated source-page PDFs. Match D-references in inventory.csv and manifest.json for the exact organized path and hash. No hosted or relative-file links are required.

Review remains necessary. Missing-page flags are review observations. Native-text, local synthetic workflow only: no OCR, production-scale, financial-analysis or professional-validation claim.
